

Email Protection Services

Proactive protection for your most vulnerable system

Email is the core of your critical business communications – and the number one attack vector. We make sure your email is safe and compliant.

From sophisticated payloads like malware and ransomware that result in data leakage and loss to social engineering tactics that prey on human endpoints, email attacks can stop your business cold.

As a result, organizations must strengthen their email operations against external attacks and insider threats, whether intentional or negligent. They also must ensure compliance with stringent and evolving regulations to protect sensitive customer and corporate data – at rest and in transit.

JurisLock Email Protection Services (EPS) makes it simple to defend your email operations against threats, ensure business continuity, and meet compliance and audit obligations. Whether you need protection for your existing on- premise, cloud-based, or hybrid email solution, JurisLock simplifies email protection. Our sophisticated and comprehensive suite of email security services seamlessly integrates to reduce your operational overhead and bolster security for your most critical business communications tool.

Real-Time Defence Against:

-  Spam, Malware, and Viruses
-  Social Engineering (phishing, baiting, etc)
-  Imposter Threats
-  Business Email Compromise Scams
-  Exfiltration
-  Negligence and Human Error
-  Wire and Vendor Fraud
-  Insider Threats

JurisLock Email Protection Services

A simple solution to a complex threat

JurisLock EPS delivers secure and multi-layered protection for your business-critical email. Our advanced, adaptable tools include AI/ML for protection against social engineering attempts, encryption, data loss prevention (DLP), and proactive monitoring by our security operations analysts who sort through and prioritize alerts from your email system for you. The result?

Powerful, advanced protection against modern email threats.

JurisLock integrates easily with Google, Office 365, and other services both on-premise and in the cloud. Secure off-site archiving ensures business continuity and provides easy access for e-discovery and audit requests.

With JurisLock EPS, your data and communications remain secure and compliant, without the burden and cost of staffing, implementing, and maintaining an in-house email security solution.

Advance Defence

More than just signature-based protection, our AI and machine-learning tools analyse email attributes and user behaviour to predict and detect evasive threats.

Content-Aware Policies

Our DLP guards against the loss of intellectual property, customer, and corporate data with policies that work against external/internal threats and accidental loss.

Robust Compliance

Our pre-built compliance policy packs make it easier for your business to comply with stringent email-related policies set by HIPAA, PCI, GLBA, and others.

JurisLock EPS keeps your business communications open, with layered, proactive email protection from insider and outsider threats.
